Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The disclosure is objected to because of the following informalities:

On page 11, line 3, change "stoped" to --stopped--,

On page 11, line 3, change "oven10" to --oven 10--,

On page 13, last line, change "trough" to --through--,

On page 14, line 24, change "provided" to --provide--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 2, 4, 5 and 10-12 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by **WO 01/98092 A1**. Applicant has submitted the prior art reference WO 01/98092 stating that when treating light weight materials, such as powders or materials, there can be a tendency for some of the material to be entrained in the flow of hot gasses passing through the heat treatment chamber which results in an overall reduction in the efficiency of the process. The applicants invention is submitted to overcome or at least reduce this problem. In claims 1, 2, 4, and 10-12, applicant has disclosed identical structure to what is shown in prior art namely charging portion (12), a rotatable changeover portion having an outer chamber (14) and in inner treatment chamber (16), a means to heat the inner treatment chamber (30) and as shown in Figures 3c & 3d, including inlet opening (36). the oven being moveable between a first position in which the changeover portion is generally higher than the charging portion and a second portion in which the charging portion is generally higher than the changeover portion, and the inner treatment chamber can received material from the charging portion as the oven transitions between these positions. The applicants invention would appear to present itself in claims 6-9 which correspond to Figure 5 in which the inner treatment chamber has a side wall consisting of an array of nozzles, it is advised that this subject matter be included in the independent claim as it appears to teach structure which is not anticipated by prior art.

Allowable Subject Matter

Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory A. Wilson whose telephone number is (571)272-4882. The examiner can normally be reached on 7 am - 4:30 pm EST.
